

4/30/99

FDA:

Please do not give in to the irradiation industry by loosening standards. We want to believe that our foods are not being manipulated to change it, decreasing the nutritional values as well as taste, smell, etc.

- ① I am asking that labeling be permanent,
- ② that there are adequate signs or bins for irradiated produce, that
- ③ labels be included on product made with irradiated ingredients, +
- ④ that there be conspicuous and prominent labeling for all irradiated foods.

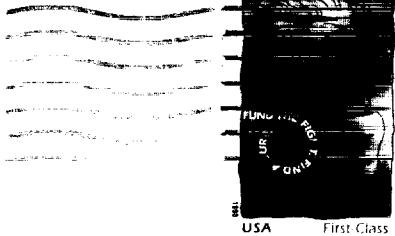

Thank you for not caving in to the people who treat the consumer like they do not deserve to know what is being done to the food

Sincerely -
